Save Up To Twenty Percent On Energy Costs And Reduce Your Impact On The Earth!

FEATURES

- Track current energy usage in estimated dollars and kilowatt-hours
- Monitor usage over time - daily, monthly, or at the end of billing cycles
- See savings benefits in dollars saved, miles driven reduced, acres of trees saved, and pounds of CO2 eliminated
- Set alarms and alerts (email, text message, etc.) when certain consumption levels or thresholds have been reached
- Upgrade to monitor water usage, as well as centrally control lighting, security and other home systems.
- Energy Guard™ - automatically adjusts systems to meet savings goals
- Contact certified BreezePlay partners through the panel for in-home computer support, entertainment solutions, and home energy audits.
- Get local traffic, weather, news, stocks and more

OUR HISTORY

BreezePlay was founded in 2008 to meet a growing need for intelligent, affordable, and sustainable solutions to the energy crisis. We believe that to be good stewards of our communities and our planet, we must engage new technologies and practices that maximize efficiency and minimize impact – both on the environment and on our customers' lifestyles.

With this as our mission, BreezePlay is committed to developing innovative ways to leverage our technological and intellectual capital to meet our customer's needs and to introduce new ways to make homes and businesses better.

Energy has become a key resource of necessity, scarcity, and increased demand in most of the world, today. We are dependent not only upon sufficient energy supplies, but also on energy production and consumption methods that allow our environment to remain healthy and sustainable.

While there are many opinions on which paths are best to follow to achieve sufficient, clean energy supplies going forward, there is no disagreement that efficiency and conservation measures are critical as we strive for improved technologies and energy production methods for the future.

EnviroScape™ is an intelligent energy tracking and control portal that reports and manages energy consumption in a home.

ENERGY MANAGEMENT

BreezePlay has developed a revolutionary in-wall touch panel that is highly sophisticated and interactive. The EnviroScape features a graphic user interface that reports usage data on a real-time basis, and allows customers to make adjustments, accordingly.

In addition, the EnviroScape™ can monitor a home's energy usage 24/7 and automatically adjust components like thermostats, lighting, and water heaters to maximize efficiency and minimize the impact on the environment. Customers can even set goals and consumption limits, and receive alerts via email, text message, and/or the panel itself if usage outside of these parameters occurs.

Hourly, daily, weekly and monthly reporting is provided so customers and utilities can track how conservation efforts are saving energy and money. The EnviroScape™ system can also be accessed through any web-enabled device and controlled remotely.

The EnviroScape™ is the ONLY residential consumer product on the market that is monitored 24/7 to provide actual usage and savings data, and that can provide controls to automatically adjust systems to effect consumption and automate savings.

The benefits of monitoring include:

- Real-time updating of energy rates
- Online access to personal energy and water* usage reports, as well as security*, thermostats, and lighting*
- Ability to manage and adjust Energy Guard™ settings
- Ability to upload personal pictures to touch panel, enabling it to function as a digital photo frame when not in use.
- Automated feature and service updates, as well as upgrades and troubleshooting.
- Community messages and reminders.

* Optional Upgrades

BREEZEPLAY SERVICES

BreezePlay customers have access with the EnviroScape touch-panel to these useful services through a network of certified professionals.

HELP IS JUST A TOUCH A WAY!

GREENOVATIONS ■ HOME ENERGY AUDITS & ENVIRONMENTAL HEALTH INSPECTIONS

BreezePlay offers customers licensed Energy Assessments through a network of certified Home Energy Raters (HERS). This unique service provides a complete and thorough inspection of your home by certified Building Science professionals to pinpoint areas of energy inefficiency and to advise on solutions to save money and create a healthy environment. Licensed partners are Energy Star Certified and can make your home safe, comfortable, and efficient.

PUT THE GREEN IN YOUR HOME AND YOUR WALLET

From simple improvements such as wrapping ducts and weatherizing windows, to complete lighting and automation systems that control electricity and manage use, BreezePlay Greenovations partners will help you make a big difference for your wallet and the planet.

COMMON PROBLEMS

- High Utility Bills
