# GREEN HORIZON

## SAVE \$1000 A YEAR ON HEATING AND COOLING

- Installation of High Efficiency HVAC Systems & Geothermal Heating & Cooling
- Expert Repair of Any Make or Model
- Maintenance Plans from \$169/year

"In our region, HVAC systems work hard year-round - removing moisture and controlling heat in summer, and keeping your house warm in winter. They are one of the most important components for maintaining a healthy, efficient and economical home."

Brant Wurster, Green Horizon HVAC Specialist

## HVAC IS THE BIGGEST ENERGY CONSUMER IN YOUR HOME

Effective heating and cooling is one of the most important components of a healthy, efficient home. Installing a high efficiency HVAC system is often the best way to bring down your energy bills and boost the performance of your home at the same time.

## THE RIGHT SYSTEM FOR THE RIGHT HOME

Selecting the correct size and type of system is vital. Our building science team has over 20 years experience and specializes in Energy Star rated high-SEER systems. We visit your home to identify the appropriate solution for you - working with our equipment suppliers to ensure that your system is at the cutting edge of efficiency. (And just as our Whole House Promise says, if HVAC isn't the best answer for you, we'll recommend what is.)

## GEOTHERMAL HEATING & COOLING

The temperature of the air fluctuates according to the weather, but the ground maintains a steady temperature of 57 degrees year round. Geothermal heating and cooling puts that difference to work for you. According to the US EPA, Geothermal offers the most cost-effective technologies for regulating your home's temperature. Compared to regular HVAC, geothermal can reduce your bills by 40-70%. Our Geothermal experts will help you decide if it is the right solution for your home.

## PROTECT YOUR INVESTMENT

Just like a car, proper maintenance will not only increase the lifespan of your system, it will mean better air quality and lower bills too. That's why Green Horizon has launched a comprehensive HVAC maintenance plan that includes twice-annual check ups, ensuring your system performs to its full potential.

## HVAC REPAIR

No matter how well you maintain your system, sometimes things go wrong. Green Horizon's team of HVAC specialists are available to repair any system - regardless of size, age or brand.

# GREEN HORIZON'S COMPREHENSIVE HVAC MAINTENANCE PLAN

Available in one, two and three-year options.

Ask your Green Horizon representative for details about our pricing.

## Every year, our trained HVAC specialists conduct two site visits. As part of those visits, they will:

- Inspect air filter and Freon charge
- Inspect the condensate drain/pump performance and condensate pan condition
- Inspect condensate coil
- Visually inspect equipment - electrical connections, furnace heat exchanger, gas valve
- Measure the temperature differential and check thermostat operation
- Measure the amp draw for motors, lubricate motors as needed, and test capacitors to ensure optimal performance
- Operate unit for correct and safe functioning check duct work for leakage, mold, possible damage and air flow
- Check attic and crawl space for thermal envelope, insulation, moisture and other issues that can affect home comfort and health

*The services above are a guideline for maintenance performed. Our team is trained to tailor their services to the specific requirements of your unit and your home.*

## ADDITIONAL BENEFITS:

- Priority scheduling
- 15% discount on all repairs
- 10% discount on equipment replacement and upgrades
- 10% discount on any Green Horizon service
- \$25 Gift Card for every new customer referral

## FILTER REPLACEMENT PROGRAM

- (12) 30-day filters
- Monthly email reminders when it's time to replace them
- Media and pleated filters replaced for an additional charge
- Pricing varies according to filter type. Ask your Green Horizon representative for details.
